RE: Bohaty Drum Site
Medina, Medina County, Ohio
TDD#: T05-9210-130

Dear Ms. Nebasny,

On November 5, 1992, the Ecology & Environment, Inc. (E & E) Technical Assistance Team (TAT) was tasked by the United States Environmental Protection Agency (U.S. EPA) under Technical Directive Document (TDD) T05-9210-130 to provide assistance to the U.S. EPA On-Scene Coordinator (OSC) in reviewing CERCLA paperwork regarding contractor personnel and equipment used during the removal activities.

The TAT provided assistance to the OSC in completing the cost accounting and final site documentation following the removal activities. A report outlining the removal action activities was submitted in September 1992 under TDD# T05-9112-035.

During February, 1993, the ERCS contractor submitted the remainder of the outstanding site invoices and cost paperwork. At the request of the OSC, the TAT completed the final review of paperwork and submitted it to the OSC. The tasks as requested in the TDD have been completed and submitted, as requested, to the OSC. At the request of U.S. EPA OSC Steven Renninger, the TDD is closed with the submission of this deliverable.

If you need any further information or have any questions, please feel free to contact me.

Sincerely,

ECOLOGY & ENVIRONMENT, INC.
Region V Technical Assistance Team
